

Greenlinks

COMMON NAME: Turf Type Annual Ryegrass

SPECIES: *Lolium multiflorum*

Greenlinks turf type annual ryegrass was developed by OreGro Research for areas that need a fast transition from cool-season to warm-season turf in the spring. Greenlinks has proved itself across the country against several competitive turf type annual ryegrass varieties and has shown superior characteristics. With turf professionals in mind, Greenlinks provides a cost effective, high quality turf, without the problems of establishment and transition that commonly plague perennial ryegrass.

MEDIUM MATURITY

USAGE
Mixtures with perennial ryegrass, fine fescues, tall fescues, and Kentucky bluegrass
Overseeding warm season grasses
Quick temporary cover

SEEDING RATES

Mixtures: 1-5 lb per 1,000 sqft

Quick Cover: 10 lb per 1,000 sqft

Overseed: 10 lb per 1,000 sqft
450lbs/acre

Greenlinks

Turf

COMMON NAME:
Turf Type Annual Ryegrass

SEED COUNT:
220,000 seeds/lb

FERTILIZER MANAGEMENT

- Always take a soil test and consult your local extension service or fertilizer dealer for specific recommendations.
- Correct soil acidity, best between 5.5 and 7.
- Sowing: depending on the results of the soil test, a complete fertilizer such as 16-16-16 at 5 lb per 1,000 sqft, is helpful for establishment.
- Applying 1 lb of nitrogen per 1000 sqft four times per year will keep the turf a pleasant green color. One of the applications should be made in the late fall.

4A, 4B				●	●				●	●		
5A, 5B					●	●			●	●		
6A, 6B					●	●						

SOIL TYPE

Adapted to a wide range of soils from clay loam to sandy loam. Soil should have adequate surface drainage.

IRRIGATION MANAGEMENT

- Sowing: Keep soil uniformly moist until grass has emerged. Reduce watering, depending on weather conditions.
- Maintenance: Depending on weather conditions, irrigate as needed to prevent wilting and dormancy. Irrigating deeply and infrequently will force deeper rooting and enhance drought tolerance.

MOWING MANAGEMENT

- Healthiest mowing height is between 3 and 4.5 inches. Mow when no more than 1/3 of the leaf blade is removed.
- Sports fields may be mowed shorter for short periods of time.
- Roadsides/low maintenance: mow once per year up to once a month. Mow higher for better turf resilience.
