

# Paraiso

COMMON NAME: Turf Type Tall Fescue

SPECIES: *Festuca arundinacea*

Paraiso turf type tall fescue was bred to outlast most other turf type tall fescue. Performing well in cold northern states with hot summers, Paraiso performs equally well in the southern and transitional zones with excellent drought tolerance. With good resistance to brown patch, red thread, pythium blight, and microdochium patch diseases, Paraiso is aggressive and very persistent. By itself or in a blend, Paraiso will provide a high quality turf with minimal inputs.

## MEDIUM MATURITY

USAGE
Home lawns
Sports fields
Parks
Roadsides
Low maintenance

## SEEDING RATES

Lawns, parks: 8-10 lb per 1,000 sqft

Sports fields: 10 lb per 1,000 sqft

Roadsides: 150-250 lb per acre

# Paraiso

Turf

COMMON NAME:

Turf Type Tall Fescue

SEED COUNT:

220,000 seeds/lb

## FERTILIZER MANAGEMENT

- Always take a soil test and consult your local extension service or fertilizer dealer for specific recommendations.
- Correct soil acidity, best between 5.5 and 7.
- Sowing: depending on the results of the soil test, a complete fertilizer such as 16-16-16 at 5 lb per 1,000 sqft is helpful for establishment.
- Applying 1 lb of nitrogen per 1,000 sqft four times per year will keep the turf a pleasant green color. One of the applications should be made in the late fall.

5A, 5B				●	●				●	●		

## SOIL TYPE

Adapted to a wide range of soils from clay loam to sandy loam. Soil should have adequate surface drainage.

## IRRIGATION MANAGEMENT

- Sowing: Keep soil uniformly moist until grass has emerged. Reduce watering, depending on weather conditions.
- Maintenance: Depending on weather conditions, irrigate as needed to prevent wilting and dormancy. Irrigating deeply and infrequently will force deeper rooting and enhance drought tolerance.

## MOWING

- Healthiest mowing height is between 3 and 4.5 inches.
- Mow when no more than 1/3 of the leaf blade is removed.
- Sports fields may be mowed shorter for short periods of time.
- Roadsides/low maintenance: mow once per year up to once a month. Mow higher for better turf resilience.
