

Pinstripe II

COMMON NAME: Perennial Ryegrass

SPECIES: *Lolium perenne*

Pinstripe II perennial ryegrass was developed by Oreagro Research for overseeding in the southern half of the United States. Exhibiting dark green color, fine leaf texture, and excellent striping ability, Pinstripe II is an exceptional choice for overseeding golf courses, sports fields, and home lawns.

MEDIUM MATURITY

| TURF | WINTER OVERSEEDING |
|------------------------------|------------------------------|
| Athletic fields, playgrounds | Greens |
| Fairways, roughs | Tees |
| Parks, home lawns | Fairways, roughs |
| Low maintenance | Athletic fields, playgrounds |

SEEDING RATES

TURF

Athletic fields, playgrounds: 8-10 lb per 1,000 sqft
 Fairways, roughs: 8-10 lb per 1,000 sqft
 Parks, home lawns: 8-10 lb per 1,000 sqft
 Low maintenance: 3-5 lb per 1,000 sqft

WINTER OVERSEEDING

Greens: 30-40 lb per acre
 Tees: 20-30 lb per acre
 Fairways: 300-600 lb per acre
 Roughs: 250-500 lb per acre
 Athletic fields, playgrounds: 10-15 lb per 1,000 sqft

Pinstripe II

Turf

COMMON NAME:
Perennial Ryegrass

SEED COUNT:
240,000 seeds/lb

ESTABLISHMENT

- Pinstripe II germinates and establishes quickly on a prepared seedbed. Rake soil smooth, rake in seed, and roll to firm the seedbed. Topdressing with mulch will aid in moisture conservation.
- If overseeding warm-season grasses, scalp off as much material as possible and remove.
- Broadcast the seed, and topdress with sand, mulch, or other suitable products no greater than 1/2" in depth.
- Under ideal conditions, there should be color within a week, and the first mowing will be between two and three weeks.

CLIMATE

MONTHS OF SOWING

IRRIGATION

During establishment, keep soil uniformly moist. After the turf is established, water deeply as needed to keep the turf actively growing and healthy. Adapt your water applications to your soil type, structure, and local weather conditions.

FERTILIZATION

- A soil test will accurately measure nutrient level and acidity of your soil. Adjust soil acidity and apply a complete starter fertilizer before planting.
- Apply 3-6 lb of nitrogen per 1,000 sqft annually in split applications. Consult your local garden center, extension agent, or fertilizer company for local needs and special conditions.

MOWING

- Using a sharp mower, adjust your mowing heights accordingly.
 - Home lawns, parks: 3 inches
 - Sports fields: 2-3 inches
- In specific uses, perennial ryegrass may be mowed as short as 1/4 inch for brief periods. Always mow when less than 1/3 of the leaf blade will be removed.
