

# Ringer II

COMMON NAME: **Perennial Ryegrass**

SPECIES: *Lolium perenne*

Ringer II perennial ryegrass was developed by OreGro Research as a polycross of top performing cultivars and selections from old turfs under severe winter and summer stresses. With enhanced disease resistance for red thread, gray leaf spot and anthracnose, Ringer II is quick to establish and is an excellent option as a pure stand, or in mixtures with Kentucky bluegrass or fine fescues.

## MEDIUM MATURITY

TURF	WINTER OVERSEEDING
Athletic fields, playgrounds	Greens
Fairways, roughs	Tees
Parks, home lawns	Fairways, roughs
Low maintenance	Athletic fields, playgrounds

## SEEDING RATES

### TURF

Athletic fields, playgrounds: 8-10 lb per 1,000 sqft

Fairways, roughs: 8-10 lb per 1,000 sqft

Parks, home lawns: 8-10 lb per 1,000 sqft

Low maintenance: 3-5 lb per 1,000 sqft

### WINTER OVERSEEDING

Greens: 30-40 lb per acre

Tees: 20-30 lb per acre

Fairways: 300-600 lb per acre

Roughs: 250-500 lb per acre

Athletic fields, playgrounds: 10-15 lb per 1,000 sqft

# Ringer II

Turf

COMMON NAME:

Perennial Ryegrass

SEED COUNT:

240,000 seeds/lb

## ESTABLISHMENT

- Ringer II germinates and establishes quickly on a prepared seedbed. Rake soil smooth, rake in seed, and roll to firm the seedbed. Topdressing with mulch will aid in moisture conservation.
- If overseeding warm-season grasses, scalp off as much material as possible and remove.
- Broadcast the seed, and topdress with sand, mulch, or other suitable products no greater than 1/2" in depth.
- Under ideal conditions, there should be color within a week, and the first mowing will be between two and three weeks.

## CLIMATE

## MONTHS OF SOWING

### ZONES

## IRRIGATION

During establishment, keep soil uniformly moist. After the turf is established, water deeply as needed to keep the turf actively growing and healthy. Adapt your water applications to your soil type, structure, and local weather conditions.

## FERTILIZATION

- A soil test will accurately measure nutrient level and acidity of your soil. Adjust soil acidity and apply a complete starter fertilizer before planting.
- Apply 3-6 lb of nitrogen per 1,000 sqft annually in split applications. Consult your local garden center, extension agent, or fertilizer company for local needs and special conditions.

## MOWING

- Using a sharp mower, adjust your mowing heights accordingly.
  - Home lawns, parks: 3 inches
  - Sports fields: 2-3 inches
- In specific uses, perennial ryegrass may be mowed as short as 1/4 inch for brief periods. Always mow when less than 1/3 of the leaf blade will be removed.
